1 Introduction

The use of technology as a tool and enabler has become an integral part of school and home life. Cognita is committed to the effective and purposeful use of technology for teaching, learning and administration and is fully committed to protecting its staff (including contractors and peripatetic teachers), students, parents and visitors, collectively “stakeholders” from illegal or harmful use of technology by individuals or groups, either knowingly or unknowingly.

Cognita actively promotes the participation of parents to help the school safeguard the welfare of students and promote the safe use of technology.

This policy applies to the use of IT equipment, applications and services collectively “technology” (both on and off-site) that is supplied and/or made available to stakeholders via the school and/or regional office networks.

A copy of this policy is available on request and posted on the school website.

In the event of a breach of this policy, failure to have read this policy will not be accepted as a defence by any stakeholder. In such cases, Cognita reserves the right to investigate and take necessary action.

2 Policy Purpose

- 2.1 Promote a culture of responsible behaviour, safe use of, and care for any technology available to stakeholders in both schools and regional offices (whether on or off-site).
- 2.2 Outline the acceptable and unacceptable use of technology in schools and regional offices (both on and off-site).
- 2.3 Outline the main roles and responsibilities of all stakeholders when using Cognita technology.
- 2.4 Educate and encourage students to make good use of the educational opportunities presented by access to technology at their school.
- 2.5 Safeguard and promote the welfare of students, in particular, by anticipating and preventing the risks arising from:
 - Deliberate or unintended exposure to harmful and/or inappropriate content such as pornographic, racist, extremist and/or other offensive content
 - Inappropriate contact from known adults outside of school and/or from strangers
 - Inappropriate conduct around the use of technology
 - Cyber-bullying and/or online abuse
 - Copying and sharing of personal data
 - Commercial related concerns and risks; e.g. fraud, scamming, and/or extortion
- 2.6 Outline process and requirements for reporting misuse of technology and incidents.
- 2.7 Ensure arrangements are in place for all stakeholders to keep them safe and secure.

3 Policy Scope

- 3.1 This policy applies to all stakeholders Cognita schools and offices.
- 3.2 Schools will take a wide and purposive approach to considering what falls within the meaning of technology. This policy relates to all technology, computing and communications devices, network hardware, software and services associated with them including but not limited to:
- The school network, WIFI and internet access
 - Hardware and digital devices, including 'Smart' devices
 - Software (cloud based and on-premise)
 - Communication and collaborations applications (e.g. email, Microsoft Teams, WhatsApp, Snapchat)
 - Virtual Learning Environments
 - Social media (e.g. Facebook, Instagram, Tik Tok, X - formerly Twitter)

This policy applies to any member of the school community where the culture or reputation of the school and/or stakeholders are put at risk by their behaviours or actions.

4 Roles and responsibilities

This policy document is the responsibility of the Cognita Europe & United States Head of IT who shall ensure that technology is deployed and monitored in line with this policy as well as other relevant policies.

- 4.1. The POD General Managers (UK), Managing Director (Spain, Italy and Switzerland) and School Heads are responsible for publishing this policy and its ongoing implementation and monitoring at a school level.
- 4.2. All stakeholders are responsible for adhering to the policy.
- 4.3. The Head of Cybersecurity is responsible for the cyber services as well as filtering and monitoring process.
- 4.4. The Designated Safeguarding Lead (DSL) (known as the Child Protection Co-Ordinator (CPC) in Spain) is responsible (with the delegated support of deputies/and or IT colleagues) for having an overview of safeguarding and online safety. This includes (but is not limited to):
- Monitoring student's online activity and completing records of this (further details in Appendix A – Web Filtering Statement)
 - Following up on safeguarding concerns related to digital communication or all IT related matters concerning students, their parent(s) or carer(s) and external agencies as required (further details in Cognita's Safeguarding Policy)
 - Raising any complex concerns in relation to monitoring devices and/or results of this with regards to individual students with the Regional Safeguarding Lead (who will escalate as needed to the Europe Head of IT if the matter involves a technology component)
 - Ensuring that staff are trained in terms of online safety for children, and how to recognise risks and any indicators of concern
 - Ensuring that children are taught how to keep themselves safe online, and the potential risks around online activity

5 Safe Use of Technology

- 5.1. The school is committed to the safe and purposeful use of technology for teaching, learning, and administration.
- 5.2. Use of technology must be safe, responsible, respectful to others, and legal. Stakeholders are responsible for their actions, conduct and behaviour when using technology at all times.
- 5.3. The school will support the use of technology and make internet access as unrestricted as necessary, whilst balancing the educational needs, safety, and welfare of relevant stakeholders, as well as the security and integrity of our systems.
- 5.4. Monitoring, logging, and alerting tools are in place to maintain technology safety, safeguarding, and security for the protection of stakeholders.
- 5.5. The filtering and monitoring tools are reviewed centrally on an annual basis to ensure that the current provision addresses all needs of our staff and students. This review involves colleagues in IT, Cyber Security, and Safeguarding, as well as Governors and Proprietors.
- 5.6. In the interest of safeguarding students, student 1-to-1 devices have monitoring software pre-installed which blocks certain sites and provides live and historic data regarding the device usage e.g. web browsing. The data collected is stored for up to a 90-day period.
- 5.7. The monitoring software uses Artificial Intelligence (AI) to determine how new websites are filtered and which categories their content falls within (further details in Appendix A).
- 5.8. IT Support and IT Management have the authority to make manual changes within the filtering system in schools provided they have approval from the School Senior Leadership Team (SLT) and/or Regional IT.
- 5.9. The school safeguarding team is responsible for having an oversight of the monitoring systems and processes in place. Safeguarding teams in school regularly monitor student's use of school devices, prioritising vulnerable students, whilst also undertaking random checks where operationally possible. Training is available to support staff to understand how to analyse the filtering data within the [Lightspeed](#) system.
- 5.10. All staff, and those with governance oversight, have annual cybersecurity awareness training.
- 5.11. All staff should understand the expectations and responsibilities related to the filtering system. All staff should have an understanding that the filtering system is in place to safeguard students from harmful online content including that related to (but not limited to) pornography and mature/adult content, radicalisation, violence, hate and racism, criminal activity and terrorism*. The appropriateness of any filtering and monitoring systems are a matter for individual schools and will be informed in part, by the risk assessment required by the Prevent Duty (UK). *In line with the UK Government strategy to stop individuals from becoming terrorists and/or supporting terrorism otherwise known as Prevent.
- 5.12. The school can request that bespoke changes are made to the filtering system for their school, and shall be requested via the Cognita Service Desk or the IT Manager.

-
- 5.13. We want students to enjoy using technology and to become skilled users as technology has become a fundamental part of education, not only as the vehicle to deliver great teaching and learning, but as a platform for collaboration and productivity.
- 5.14. It is each school's responsibility to educate students about the importance of safe and responsible use of technology to help protect themselves and others online. Regional IT support this via various resources and policies (including this one).
- 5.15. Cognita encourages feedback and participation from parents, for example, via the 'Voice of the Parent' (VoP) survey, to help promote the safe use of technology for students.
- 5.16. Any concern regarding unsafe or inappropriate use of technology must be reported to a member of the SLT, Head of School or DSL/CPC or Cognita's Service Desk on the same day of the identification of the concern.
- 5.17. Any serious incident involving unsafe or inappropriate use of technology must be reported immediately by the Head School and/or DSL/CPC to the Cognita Europe Head of IT and United States (for technology matters) and to the Regional Safeguarding Lead (for safeguarding matters) who will work with relevant colleagues to record, investigate and mitigate risks related to the incident. A Serious Incident Referral Form (SIRF) must be completed by the school, following their investigation and interventions with support from Regional IT and Safeguarding.
- 5.18. All users of technology may find the following resources helpful in keeping themselves and others safe online:
- [UK Safer Internet Centre](#)
 - [Internet Matters - resources](#)
 - [Google Family Safety](#)
 - [Common Sense Media](#)

In addition, schools should consider meeting the Cyber security standards set by the government and/or local authorities.

To support schools to meet this duty, the Department for Education has published [filtering and monitoring standards](#) which set out that schools should:

- Identify and assign roles and responsibilities to manage filtering and monitoring systems
- Review filtering and monitoring provision at least annually
- Block harmful and/or inappropriate content (e.g. explicit images, violent or hateful content, and other forms of harmful media) without unreasonably impacting teaching and learning
- Have effective monitoring strategies in place that meet their safeguarding needs.

6 The Right to Use School and Office Network and Equipment

- 6.1. School employees and students will be allocated a username and password for accessing technology devices and services. They must **not** allow other individuals to use their account and shall not share any passwords with anyone.
- 6.2. School email accounts should only be accessed through Cognita's Microsoft Office 365 and all other third-party email services are **not** allowed.
- 6.3. Some shared resources (available in school and offices for use by employees and students) will have a generic username and password for access and is managed by the teacher.
- 6.4. All school technology remains the property of Cognita. The school may reasonably request the device or withdraw access to the service, for any student, at any time and, if applicable, the device must be returned to the school by the student.
- 6.5. Only school devices must be connected to the school network and personal devices should only connect to the guest network; if allowed by a member of the school SLT.
- 6.6. Staff's personal devices must not be used for work related tasks in the school and must never be used where students are present.
- 6.7. Any attempt to access or use any account, email address or IT resource belonging to another stakeholder is prohibited, unless that attempt is made by Regional IT for legitimate business reasons and/or has been authorised via a [Access to Mailbox and Files Request Form](#).
- 6.8. Designated devices may be issued to school employees and students for teaching, learning, and administration:
 - Students assigned a 1-to-1 device are required to sign the iPad/Laptop Usage Agreement (link in the Appendix)
 - Students with a designated 1-to-1 device may use this in lessons at the direction of their teacher
 - School employees and students are responsible for the safety and security of their assigned device when taken outside of the school
 - School issued devices and associated peripherals should be returned in good condition (excluding ordinary wear and tear) and in working order when a stakeholder finishes their time as a student or staff member at the school
 - Damaged and/or defective staff devices are replaced, and the costs are covered centrally
 - Parents are responsible for the cost of a 'repair' or 'like for like' replacement of an assigned device (as directed by the school), if it is damaged / lost intentionally, willfully or through neglect

7 Appropriate Use of Technology for Digital Safety

7.1. The school provides **System and Application Accounts** for stakeholders for educational and administrative purposes.

7.2. Stakeholders must **not**:

- Allow anyone to use their account unless authorised (in writing) by SLT and/or the Regional IT Team
- Use someone else's account
- Leave their device unlocked and/or logged into their account when not in use
- Use mobile messaging apps to communicate with parents, and/or staff with students
- Send messages and/or emails from school accounts that purport to come from an individual other than the person actually sending the message, unless approved by a member of the school SLT
- Send work related messages and/or emails to/from a personal account

7.3. The school provides **Hardware and Software** to support education and the running of the school operation.

- Users of school technology equipment are expected to take care of the equipment through responsible behaviour.
- School technology must **not** be removed from school site except where:
 - The device is assigned to an individual member of staff; or
 - The device is assigned to a student via the 1-to-1 programme; or
 - There is written permission from a member of the SLT
- School technology assigned to staff and students is the responsibility of the assignee
- Stakeholders must **not** leave portable technology equipment, including school-issued devices unattended unless, such equipment is out of use (either due to fault(s) or simply, logged out of and shutdown) in which case, it must be stored securely
- Loss or damage of school technology must be reported to a teacher, member of the SLT or IT Support Team on the same day
- Theft of school technology assigned to an individual member of staff or to a student via the 1-to-1 programme must be reported to the Police by a member of SLT and be reported to a teacher, member of the SLT or IT Support Team on the same day with the Police crime reference number.
- Deliberate abuse or damage of school technology equipment will result in the person(s) responsible being billed for the full replacement or repair costs of the equipment

Stakeholders must **not**:

- Attempt to install unapproved software or applications onto school devices.
- Download or access illegal software on school devices.
- Download any software packages from the school network onto portable media or personal devices.
- Attempt to copy or remove software from a school device.
- Attempt to alter the configuration of the hardware equipment or any accompanying software unless under the written instruction of the SLT and/or Regional IT.

-
- 7.4. The school provides technology resources for accessing and storing data and has filtering systems in place to block access to unsuitable material, wherever possible, to protect the welfare of stakeholders (further details in Appendix A-Web Filtering Statement).

Stakeholders must **not**:

- Bypass website filtering systems and/or technology security systems (via 'Tor' browsing, browser extensions and/or VPNs) whilst using school devices whilst on and/or off-site
- Access or attempt to access data for which they are not authorised
- Interfere with digital work belonging to other users
- Share private, sensitive and/or confidential information unless:
 - they have authority to share
 - the method of sharing is secure and does not use identifiers
 - the recipient is authorised to receive that information
 - there are safeguarding reasons (in which case only the Safeguarding team can share)

It is the responsibility of technology users when accessing data to be aware of Intellectual Property rights infringement including copyright, trademark, patent, design and moral rights.

- 7.5. The school endeavours to safeguard and where possible mitigate all **Security** risks associated with technology and will engage and collaborate with Regional IT, if required.
- 7.6. Concerns regarding any of the following must be reported to the Head or member of SLT who will, as required contact the Regional Safeguarding Lead and/or the Regional IT Team as soon as possible on the same day:
- Access to unsuitable material/content on a school device or on the school network
 - Misuse of technology which has caused harm or abuse to another (or likely/potential to)-proportionately on a case-by-case basis
 - Concerns regarding viruses and other malicious software
 - Suspicious emails, links, and/or websites or any other communication

- 7.7. It is the responsibility of all technology users to ensure the **Welfare** of themselves and others both on personal and school devices. Stakeholders must **not**:

- Use their own or the school's technology to bully others online (cyber bullying) or disrupt the learning of others
- Use their own or the school's technology to make contact or engage with people who they do not know
- Use their own or the school's technology to create, store, or share sexualised and/or any inappropriate/illegal content including images, audio, video and/or text

Stakeholders must:

- Report any concerns regarding welfare associated with the use of technology to a teacher, member of the School Leadership Team or DSL/CPC at the earliest opportunity.

Staff **must never** forward inappropriate content that they have received from a child, parent or staff

member to any other child, parent, or staff member. Should they receive something of this nature, they must notify the DSL/CPC and Head immediately, who will seek advice from the Regional Safeguarding Lead. Staff must not delete the content until advised to do so.

- 7.8. The internet provides users with unprecedented opportunities to obtain information, engage in discussions, collaborate and liaise with individuals, organisations and groups worldwide so as to increase skills, knowledge, awareness, and abilities.
- 7.9. The school provides appropriate access to the **Internet and Social Media** to support education and the running of the school business.
- 7.10. The school actively supports access to the widest variety of information resources available, accompanied by the development of the skills necessary to filter, analyse, interpret, and evaluate information encountered. Stakeholders must **not**:
- Use a school device or the school network to intentionally visit internet sites that contain obscene, illegal, hateful, abusive, offensive, pornographic, extremist or otherwise inappropriate content.
 - Use a school device or the school network to access gambling websites.
 - Connect (in any capacity) with students under the age of nineteen on any social networking site or via personal mobile phones, or professional platforms. Should they receive a connection request they must not reply (please refer to the Code of Conduct).
 - Make offensive or inappropriate comments, including bringing the school's name and reputation into disrepute, and/or about any parent or child associated with the school, on any forum/platform, such as social media sites (whether using a school device or not) where a connection between the user and the school can reasonably be made

Stakeholders must:

- Notify a member of the SLT, DSL/CPC or IT Support Team of any inappropriate material/content that has been accessed on a school device or on the school network so that this can be investigated, and access can be blocked in a timely manner. Schools will contact regional support colleagues, if required
- Recognise and respect the privacy of stakeholders on social media sites.

8 Cognita Allocated Devices: Access & Privacy

- 8.1. Access to assigned devices and digital files (content):
- School technology devices assigned to staff and students are for the sole use of the assignee
 - Student 1-to-1 devices may be loaded with a Classroom Management Application which enables appropriate functionality for the teacher to control and view the students screen during the lesson period
 - Cognita reserves the right to carry out periodic device inspections to check the physical state of the device and to verify that only approved software is installed
 - Cognita devices may be loaded with Remote Support Applications which enables IT support staff to log on to the devices to provide remote assistance; this may only be used with the permission of the device assignee and IT support staff will disconnect from the device once the session ends

- Cognita reserves the right to access an assigned device and monitor its use and content under the following special circumstances including, but not limited to:
 - To detect and/or prevent crime
 - To enable system security protection (e.g. Virus, Malware, Hacking or any other Risk)
 - To investigate potential misuse, abuse and/or illegal activity
 - To investigate safeguarding concerns
 - To monitor compliance with employment and statutory obligations
 - To guarantee the integrity of the school devices and IT systems
- To access an assigned device, written permission must be given as follows:
 - Cognita HR Director or Partner for a device assigned to a member of staff
 - The School Head for a device assigned to a student
- Data on a Cognita device or accessed through a Cognita device is governed by Cognita & School Privacy Policies
- In safeguarding investigations, full access may be needed immediately on the student/staff member's device. This may be completed without written permission where there are concerns that a student/other may be at risk of harm. Access can be undertaken by a member of the safeguarding team only, the Head, with support from Regional IT where needed. *Please note that non-direct access will be made on a routine basis to undertake monitoring checks (see 4.4).

9 Photographs and Images

- 9.1. The school abides by data protection legislation, namely, the General Data Protection Regulation 2018 (as amended, extended or re-enacted from time to time), and understands that an image or video of a data subject is considered sensitive personal data. It seeks written consent from parents to publish images or videos for external publicity or marketing purposes, such as the school website, and for internal purposes, such as a yearbook or on a parent portal. Parents, guardians and students 13 years and over may withdraw this permission at any time via the 'Use of Images' form and/or by informing the school's Administration Team in writing.
- 9.2. The Cognita Code of Conduct for Staff states that 'Cognita does **not** permit the use of personal mobile phones, Smart devices, and cameras by staff where students are present'.
- 9.3. Personal devices must **never** be used to take, store or share images of students.
- 9.4. The [Early years foundation stage statutory framework](#) require all schools to have a clear policy on the use of mobile phones and devices.
- 9.5. Stakeholders are not permitted to use work devices such as mobile phones, cameras or digital recorders to photograph or record members of staff or students without their written permission (in the case of students under 13, permission must be sought in writing from their parent(s)). Permission may only be granted by the school in the event of performances/events organised by the school (and clear boundaries will be described).

-
- 9.6. Parents are asked to be considerate when taking videos or photographs at school events (with permission – see above 9.5) and are requested not to publish material of other students in any public forum without the permission of the relevant family.
- 9.7. It is illegal to sell or distribute recordings from events without permission. Any parent who does not wish for their child to be videoed or photographed at school events by other attendees must notify the school in advance and in writing.

10 Use of School Equipment for Personal Use

- 10.1. School devices and IT systems are provided for school work and business purposes only; should a member of staff decide to use the equipment and/or IT systems for personal use, please be informed that it will be at your sole risk and could be considered as a breach of this IT Policy. Furthermore, as per Section 8 of this Policy, Cognita is entitled to access and monitor the use and content of the school equipment and technology, including the personal communications that may have been made through those school means.
- 10.2. Only approved software and applications may be installed on a Cognita device or used via a browser as per Cognita's Data Privacy Impact Assessment (DPIA) process. To find out more about this process, please click [here](#). A list of approved (as well as unapproved and pending) software and applications can be found [here](#). To find out more about DPIA, please refer to section 14 of this policy.
- 10.3. School devices and networks must **not** be used to carry out any illegal activity.
- 10.4. Staff shall **not** conduct any private or financial transactions on shared equipment as these carry a risk of a data breach.

11 Use of personal equipment in School

- 11.1. Personal devices must **not** be connected to the school network, other than to the guest Wi-Fi network.
- 11.2. No personal devices must be used where children are present (see sections 9.2 and 9.3).

12 Procedure for Reporting Concerns and Incidents

- 12.1. Stakeholders may have concerns regarding the following, in respect of technology:
- unsafe and/or inappropriate use
 - access to unsuitable material/content
 - threat of viruses/malware or other malicious activity, including hacking
 - loss, damage or theft*

*Any case of theft, must be reported to the Police and a crime reference number obtained which must be shared with a member of the SLT as well as Regional IT.

All concerns and incidents shall be reported to the Cognita Service Desk:

12.2. Action must be taken against any such concerns or incidents, as follows:

- Stop the problem and/or remove the technology (unless to do so would jeopardise any internal investigation or that from an external agency e.g. the Police)
- Prevent exposure of the incident to others
- Report the incident or concern to a teacher, Head of school, DSL/CPC or IT Support Team as appropriate. If the situation is complex and severe, then the Head must report the matter to the Regional Safeguarding Lead, and/or the Europe Head of IT.
- Record the nature of the incident and those involved using appropriate forms as and when directed
- Preserve evidence to enable any investigation, if required

12.3. Staff must **not** carry out any investigations until they are authorised to do so by the Head, Regional Safeguarding Lead, and/or Europe Head of IT.

12.4. The Head/DSL/CPC or other nominated staff member must complete a Serious Incident Report Form (SIRF), as directed by the Head of Health and Safety/Regional Safeguarding Lead, after any investigation.

12.5. Staff must report to a member of the SLT or the DSL/CPC when:

- they witness or suspect unsuitable material/content has been accessed by stakeholders
- they witness or suspect that Teams Chats are being used to disrupt learning or be a nuisance to staff or students.
- they are able to access unsuitable material/content
- they are teaching topics which could create unusual activity on the filtering logs
- there is failure in the software and/or abuse of the system
- there are perceived unreasonable restrictions that affect teaching and learning or administrative tasks
- they notice abbreviations or misspellings that allow access to restricted material

12.6. Access to unsuitable material and concerns regarding viruses and other malicious software on a school device or on the school network must be reported to a teacher, member of the School Leadership Team or IT Support Team at the earliest opportunity on the same day.

12.7. Loss, damage or theft of school technology should be reported to a teacher, member of the School Leadership Team or IT Support Team at the earliest opportunity on the same day; theft should also be reported to the Police and a crime reference obtained (see above).

12.8. Students must take responsibility for their use of IT equipment both at school and at home; should parents or guardians have concerns or become aware of an issue, we strongly encourage prompt communication with the school so we can offer advice and support.

12.9. The school has a duty to report serious safeguarding concerns related to stakeholders to

the authorities (Social Care/Services) or to the Police, in line with statutory requirements (see the Safeguarding Policy).

13 Removal of Network Access, Accounts and Devices

- 13.1. Anyone found breaching the IT Policy may have their network access, account(s) or device removed and may be subject to further disciplinary action.
- 13.2. The school and Regional IT reserves the right to remove network access at any time.
- 13.3. The school may inform the Police or other law enforcement agency in the event of any use that could be regarded as giving rise to criminal proceedings.
- 13.4. The school takes its responsibilities in relation to digital safety and use of technology by stakeholders seriously and understands the importance of monitoring, evaluating and reviewing its policies and procedures regularly.

14 Data Privacy Impact Assessment (DPIA)

- 14.1. Cognita performs a DPIA on applications, websites, software and services, collectively “third parties” where personal data is collected. This is to ensure that the third party can be trusted with our information, particularly that pertaining to minors. To find out more about this process, please click [here](#).

Stakeholders must:

- only use approved third parties – please see list [here](#)
- limit the amount of personal data disclosed to the third party (only share information that is required for the product/service to function)
- adhere to the third party’s terms of use. This often (but not always) encompasses the following:
 - an age restriction (in the case of applications, websites and software aimed at students, this is often, but not always, 13 years old)
 - consent from an appropriate adult (e.g. teacher, parent and/or guardian) for the child to use the third-party product/service
 - a requirement from an appropriate adult (e.g. teacher, parent and/or guardian) to create an account for the child

Stakeholders must **not**:

- engage in online/public forums which may feature on an application and/or website
- engage with unknown users via an application and/or website
- use unapproved third parties and/or those pending approval unless it is authorised in writing
- use personal licenses for TV and music streaming services

15 Artificial Intelligence (AI)

- 15.1. Please refer to the **Cognita Group AI Policy**.

16 Bring Your Own Device (BYOD)

Cognita understands the importance of technology and online access to support teaching and learning objectives. However, the need to access online content must be balanced against the online safety of our stakeholders, especially our students.

BYOD is the practice of allowing individuals to bring their own (personal) technology devices on site. As of June 2024, Cognita BYOD stance differs between staff and students:

16.1. Staff are permitted to bring a personal device on-site but must **not**:

- use that device in the presence of students
- connect that device to a school network, only to the guest WIFI network
- not undertake work-related tasks on their personal device

16.2. Students must **not** use a personal device on site unless they have *written* authorisation by a member of the SLT and/or Regional IT. Students must have an exceptional reason not to use their school supplied device.

During the 2024-25 academic year, Cognita will explore BYOD in the context of students and initiate a BYOD trial at a few of our schools. That trial will determine Cognita's future stance in terms of BYOD for students.

17 Online communication and instant messages

17.1. To protect students from engaging in harmful and/or inappropriate communication, Cognita has in place restrictions on certain communication channels. These are set by default but can be changed for individual schools and/or students upon request from the Head of School and approval by the Head of Regional IT. Please see the table below which outlines what is/is not available to students, by default:

Email			MS Teams	
Send externally*	Receive externally	Send / receive between Cognita schools	Chat function	Post in a Teams channel (that they are a member of)**
✓	✗	✗	✗	✓

*To clarify – students sending external emails must have written SLT permission and a teacher cc'd into their outgoing email.

To clarify, students can, and must only leave Teams messages in spaces created and managed by teachers. Students **must not create teams in MS Teams.

18 Appendix A- Web Filtering Statement

The statement below provides details of the arrangements in place for filtering and monitoring usage within Cognita schools.

All internet usage within the school is filtered and monitored. All network traffic is routed via DNS to Cleanbrowsing which is a cloud based SafeSearch Filtering solution. Cleanbrowsing provides protection measures that block or filter Internet access to pictures that are: (a) obscene; (b) child pornography; or (c) harmful to minors. By default, Google Chrome and Microsoft Edge are set to Safe Mode. Malicious and Phishing domains are blocked. The security filter blocks access to phishing, spam, malware and malicious domains. The database of malicious domains is updated hourly and is considered to be one of the best in the industry.

All network traffic has web filtering from on-site Smoothwall Firewalls. Specific web filtering policies are applied to different groups per school (e.g. Staff, 6th form, Key Stages1-4). Smoothwall analyses the traffic against a set of policies that have been configured for the school and will either allow or block website access based on the websites categorisation and content.

All student 1to1 devices have a Lightspeed web filtering agent installed using advanced AI to automatically block millions of inappropriate and harmful sites, images, and videos.

Both Smoothwall and Lightspeed record activities for analysis, investigation and reporting. Analysis of traffic and internet usage is assessed periodically to update filtering rules.

Further details on Lightspeed Monitoring Provider Responses which highlights to what extend our filtering tool blocks harmful and inappropriate content, without unreasonably impacting teaching and learning: <https://www.lightspeedsystems.com/media-release/lightspeed-systems-gains-uk-safer-internet-centre-accreditation/>

The Regional Safeguarding Lead is available to support with any safeguarding –related issues that require escalation.

Members of the Cognita Regional IT Team are available to support with issues that require escalation.

- Cognita Head of IT – Europe & United States
- Regional Safeguarding Lead
- Group Head of Cyber Security

Appendix B - Student 1-to-1 iPad/Laptop Consent Form

STUDENT 1-to-1 IPAD/LAPTOP USAGE AGREEMENT

• Your new iPad/laptop will be an exciting and integral part of the learning experience at school from now onwards. Treat it with care and use it to collaborate with your teachers and classmates in a purposeful way that supports your learning journey. We've listed some simple guidelines below to help you stay safe and responsible when using your 1-to-1 device. Please have a read and make a firm commitment to look after your device and keep yourself and your classmates safe whilst working in the virtual environment.

BE SAFE

- Only visit websites that support the learning goals assigned by your teachers.
- Talk to your classmates on your device to collaborate on learning tasks and remember to always engage with others as if the conversation were happening face to face. Be kind and respectful at all times.
- Your device has all the necessary apps and software required for you to learn and work effectively. You shall not install any apps or change any of the settings unless your teacher has asked you to do so.

BE RESPONSIBLE

- Keep your iPad/laptop safe when you are on the move.
- Lock your iPad/laptop away when it's not with you or keep in a safe place.
- Handle your iPad/laptop with care keeping it away from food and liquids.
- Report any damage or problems to your Form Teacher.
- Respect that the laptop cameras may only be used for school-related work. Photos and/or videos of fellow students and/or school staff should only be taken with the explicit permission of the people involved.

I agree to take very good care of my iPad / Laptop by keeping it safe, and always be responsible and respectful of others in my words and actions when using it.
